GOVERNOR DEDICATES NEW BURNAM HALL

Magnificent New Women's Dormitory At Normal Is Formally Completed

What was probably one of the most notable events in the history of the Eastern Kentucky State Normal School took place on the campus Saturday afternoon at 3:30 o'clock when Gov. Morrow dedicated Burnam Hall, the new dormitory for women.

The assembling of Eastern's 900 students in front of Roark Hall to form in procession, marked the opening of the ceremonies. The student body passed in review before the stand occupied by the Chief Executive, State Superintendent Colvin, the Board of Regents, and President T. J. Coates, of the institution.

The Governor, in an eloquent address, officially dedicated the new building to the service of the present and future generations of Kentucky's teachers; to those whose high calling it is that of directing the footsteps of half of Kentucky's childhood; whose inspiring duty it is to ring the rising bell in the soul of immortal youth. His address will not soon be forgotten by those who heard him.

Superintendent George Colvin and Regent J. W. Cramack, of Owenton, also delivered addresses.

The north wing of Burnam Hall is now being occupied. The structure, when completed, will contain 180 rooms, and will be furnished with the most modern and up-to-date equipment and will, indeed, be a fitting home for the young women who attend this great college for teachers.

"WILD MAN" SCARES FOLKS IN MASON

Maysville, Ky., May 27—Wild man, maniac, fugitive or tramp, whoever it is that steals chickens, milks cows and robs pantries of Garrison's housewives nightly, has eluded all traps and spread consternation among the population of this city's small neighborhood.

The nightly prowler stays concealed during the daytime and every effort to trace his hiding place has failed. Chicago, May 27—George Sisler continues to prove himself a one-man ball team, for the St. Louis Browns' first sacker again occupies a leading position in almost every column of the American League statistics released today, which includes games of Wednesday.

Sisler heads the batters with a .439, despite the fact that this is three points lower than last week's average. He has scored the most runs, 39; made the most hits, 65; leads in total bases with 96; heads the base stealers with 18, has batted out ten two baggers, against eleven for the leaders and his circuit drives total five—enough to place him near the top.

Ed Miller, of Philadelphia, has been climbing steadily and is second to Sisler in batting with an average of .402. Miller now has ten home runs against twelve for Ken Williams, of the Browns, who has taken Babe Ruth's position as the chief slugger of the circuit. Ty Cobb is third with .398, other leading batters in 20 games or more are: Speaker, Cleveland, .397; O'Neil, Cleveland, .395; Witt, New York, .377; Clark, Detroit, .358; Schang, New York, .352; Jamieson, Cleveland, .341; Blue, Detroit, .338.

Hornsby leads the run getters with 33 tallies, is out in front in total bases with a mark of 80, and leads home run drives with nine. Max Carey, of Pittsburgh, continues to set the pace among the base stealers with nine thefts.

MOSS PRAISES JOE BOGGS' DEPARTMENT

Bell County State Senator Teils Women's Clubs of Big Work Madison Man Is Doing

(By Associated Press)

Hopkinsville, Ky., May 27—The present State Highway Commission has "done splendid work and are to be congratulated for the wonderful results, which they have accomplished," State Senator White L. Moss, of Pineville, told delegates to the annual convention of the State Federation of Women's Clubs here last night. He asserted that the "State Highway Commission should not be condemned for begging \$1,000,000 from the rich counties of the state," to build roads where federal aid funds were not available. "But, on the other hand, that a monument should be erected to them for their ability to get money with which to construct this primary system of roads."

Senator Moss addressed the convention on the subject "United We Move Forward—Divided We Stick in the Mud." He reviewed the history of the Highway Department of the state and pleaded with the women to aid in "taking Kentucky out of the mud."

"Two thirds of the people in the state are in the mud," said the senator, "and the mud-slaves of Kentucky are interested in any kind of a program that will lift them out of the mud."

"The women of Kentucky, before they had the vote, were always found fighting for progressive measures and now that they have the vote it is doubly important that they should continue their efforts towards all progressive legislation."

"At the last legislature," he continued, "there was a terrible howl from all sections of the state that the State Highway Commission had not built any roads in Kentucky and that the road system of Kentucky had broken down and a number of bills were introduced to wipe out the present system and go back to the old system. Now, the real facts were that the present commission has done a wonderful work when the true situation was disclosed."

"To explain: The United States government, beginning in 1918, passed a bill providing for Federal aid for state highways and when the present Highway Commission assumed control of road building in Kentucky in 1920, July 1, it was found that Federal aid due Kentucky had accumulated in Washington to the amount of \$6,400,000. Now there are two kinds of roads in Kentucky, both of which, however, are a part of the present highway system. I refer to those roads known as Federal aid roads. Those are the roads of which the United States pays half the cost. The other roads are called State Primary roads."

"Of the state system 1500 miles consist of Federal aid roads and 2500 miles of which are state primary roads. The only thing to do was for the State Highway Commission to use every effort to match the Federal aid, so that between July 1, 1920, and the time the recent legislature met the commission had matched every dollar of Federal aid. But in doing so it had expended the money only on Federal aid roads in approximately twenty-five counties in the state. Naturally the other ninety-five counties, notwithstanding the proposition, felt that they had been discriminated against."

Now the Highway Commission of Kentucky had available only four and one half million dollars with which to match the Federal aid, and in order to raise that money they went to wealthier counties and asked them to donate money to help us match Federal aid."

"For that the State Highway Commission has been bitterly condemned. I maintain that the Commission should not be condemned for begging \$1,000,000 from the rich counties, but, on the contrary, that a monument should be erected to them for their ability to get money with which to match Federal aid."
